

At the Children's Guild we know that our children don't do as we say, they do as we do. We own it! We create an environment that is conducive to success and we take accountability for providing life skills to our children that will contribute to their ability to reach full potential. We are developing leaders in our children through the examples set by the leadership of our staff. As we continue to grow as an organization, taking on new challenges and creating new paths in education, our need to increase focus on staff training continues to grow. We take pride in our innovation and access to the resources necessary to go to the next level. We are looking for a dedicated and equally innovative addition to our staff to create and administer a stimulating curriculum that will drive home leadership development and fine tune management skills.

Requirements:

- A bachelor's degree in organizational development or related field required, master's preferred.
- A minimum of 5 years experience creating and delivering supervisory, management and leadership programs
- An ability to work with all levels of an organization.
- Experience creating and delivering new hire-orientation programs
- Comprehensive knowledge of organizational competencies
- Excellent stand-up classroom delivery skills required
- A minimum of 3 years experience working with some type of e-learning platform
- Experience working in a non-profit or educational institution preferred
